## Schroder International Selection Fund Global Credit Income

A Distribution USD | Data as at 30.06.2025

### Important Information

The fund invests primarily in fixed and floating rate securities issued by governments and companies worldwide.

- The fund is exposed to general investment risk. Investors may be subject to loss and there is no guarantee of the repayment of principal.
  - The fund invests in debt securities which may be subject to interest rate, credit and counterparty risks and risk relating to below investment grade and unrated debt securities, etc.
  - Investment in sovereign debt obligations may expose the fund to political, social and economic risks. The fund may suffer significant losses upon defaults by government entities.
  - The fund invests in the emerging and less developed markets and may be subject to political and economic risks, legal and regulatory risks, liquidity and volatility risks, etc.
  - There is no assurance that hedging strategies employed will fully eliminate the currency exposure, and hedging transactions may preclude investors from benefiting from an increase in the value of the fund currency.
  - The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher credit risk and counterparty risk, liquidity risk and valuation risk. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.
  - For distribution share classes/units, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the fund. Distributions may be paid out of the capital of the fund at the Manager's discretion. This amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share or decrease in the value of units of the relevant Distribution Units.
- You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

## Schroder ISF Global Credit Income

Blending the right mix for  
changing investment climates

30 June 2025

Schroder ISF Global Credit Income aims to deliver a stable stream of income in all market environments by investing dynamically across the global bond market. The fund also focuses on managing risk to mitigate volatility.

Why invest in the Schroder ISF Global Credit Income?

Fixed payout of 6.5% p.a (Applicable to A Dis USD and HKD MF classes. Dividend may be paid out of capital pay attention to important information 7)^

Bonds are popular investments for people seeking income. In the current interest rate environment, which may remain high for a period of time, the fund can explore various opportunities in the global bond market by allocating to different types of bonds, aiming for relatively attractive income and balanced risk. The fund's primary objective is to maintain sustainable and attractive distribution payments, and intends to make a fixed payout of 6.5% per annum^.

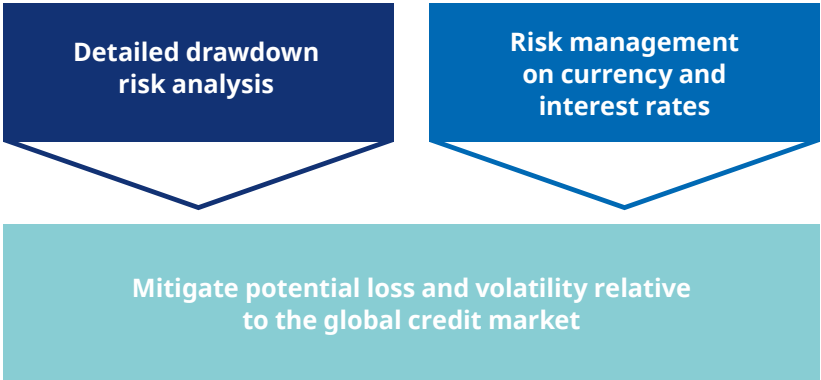

Flexibility in investing across a wide range of bonds and credits

Managed with a benchmark-unconstrained approach, the fund is not tied down to an index and therefore not limited to what bonds it can invest in. Bonds of different types and regions offer different levels of potential return. We can invest across the global bond market wherever we find attractive income opportunities. We aim to deliver a consistent and attractive level of income in all market environments by investing freely across the global bond spectrum, including investment grade, high yield, and emerging market sovereign and municipal bonds, asset-backed securities, and so on. Having a broad investment universe also helps us diversify risk effectively.

Rigorous risk management to mitigate volatility

We recognise that investors seeking income can be more sensitive to capital loss. Dynamic asset allocation informed by scenario correlation analysis allows the fund to reduce risk during market downturns by building a well-diversified bond portfolio. Detailed drawdown risk analysis as well as risk management on currency and interest rates are incorporated with an aim to help the fund mitigate potential loss and volatility relative to the global credit market.

**Dividend policy:** A and A1 Accumulation share classes – Dividend will not be distributed but will be reinvested into the fund.

A and A1 Distribution share classes – The board of directors generally has discretion as to whether or not to make any distribution save for the distribution share classes with fixed dividend policy which are subject to the disclosures below. This distribution frequency and attributes are indicated in the share class designation as follows:

M = monthly, Q = quarterly, S = semi-annual, A = annual,

Currency carry#: C

Distributions may be paid out of capital and reduce the fund's net asset value.

In respect of distribution share classes with fixed dividend policy, the distribution amount per share is calculated as follows: dividend rate ÷ distribution frequency over a year × net asset value per share on the record date<sup>Δ</sup>. Details of the distribution share classes with fixed dividend policy are set out below:

Fixed Distribution Share Class	Currency	Distribution Frequency over a year	Dividend Rate
Class A USD Dis MF	USD	Monthly (12)	6.50% per annum

Investors should note that a positive distribution yield does not imply a positive return. The board of directors will periodically review fixed distribution share classes and reserves the right to make changes.

**Financial year end of this fund:** 31 December

**Minimum investment:** A and A1 share classes: Initial – EUR1,000 or USD1,000 (or equivalent); Subsequent investment – EUR1,000 or USD1,000 (or equivalent)

\* The ongoing charges figure is based on the expenses for the year ended 31 December 2024. This figure may vary from year to year.

# This refers to the premium or discount that may apply to the distribution. Distributions may include a premium when the interest rate of a currency hedged share class is higher than the fund's base currency interest rate. Consequently when the interest rate of a currency hedged share class is lower than the fund's base currency interest rate, the dividend may be discounted. The level of premium or discount is determined by differences in interest rates and is not part of the fund's investment objective or investment policy.

<sup>Δ</sup> Not applicable to Class A1 EUR Hedged Dis MF, which will distribute the dividends based on a fixed amount per share.

## What is this product?

This is a sub-fund of Schroder International Selection Fund, a mutual fund domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier.

## Objectives and investment strategy

### Investment Objective

The fund aims to provide income and capital growth by investing in fixed and floating rate securities issued by governments and companies worldwide. The fund aims to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed.

### Investment Policy

The fund is actively managed and invests at least two-thirds of its assets in fixed and floating rate investment grade and high yield securities issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries.

The fund may invest:

- in excess of 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in asset-backed securities and mortgage-backed securities;
- up to 10% of its assets in convertible bonds (including contingent convertible bonds); and
- up to 10% of its assets in open-ended investment funds.

The investment manager will assess credit risks of fixed income instruments based on quantitative and qualitative fundamentals, including without limitation the issuer's leverage, operating margin, return on capital, interest coverage, operating cash flows, industry outlook, firm's competitive position and corporate governance issue. For this purpose, if the relevant security does not itself have a credit rating, then reference can be made to the rating of the issuer of the security. If both the security and the relevant issuer are not rated, then the security will be classified as unrated.

The fund may invest up to 40% of its net asset value in emerging market debt (fixed and floating rate) securities.

The investment manager aims to mitigate losses by diversifying the fund's asset allocation away from areas of the market identified as having a high risk of material negative return.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and money market investments, and hold cash (subject to the restrictions provided in Appendix I to the Prospectus).

It is the current intention of the investment manager that the fund will not invest more than 10% of its net asset value in securities issued by or guaranteed by any single country with a credit rating below investment grade.

The fund may invest less than 30% of its net asset value in debt instruments issued by financial institutions with loss-absorption features (e.g. contingent convertible bonds, Additional Tier 1, Tier 1 and Tier 2 capital notes, senior non-preferred notes, senior and subordinated bonds issued by holding companies of a financial institution). These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger events.

The fund may invest up to 10% of its net asset value in insurance-linked securities ("ILS"), such as catastrophe bonds, issued outside Hong Kong and/or any ILS-related products, such as derivatives or structured products whose returns are linked to the performance of any ILS and collective investment schemes whose investment objective or principal investment strategy is investing in ILS. For the avoidance of doubt, the fund will not invest in ILS issued in Hong Kong and their repackaged products and derivatives.

Under exceptional circumstances (e.g. market crash or major crisis), the fund may be invested temporarily up to 100% of its net asset value in liquid assets such as bank deposits, certificates of deposit, commercial paper and treasury bills for cash flow management.

The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Derivatives may be employed for instance to generate additional income from exposure to credit risk in purchasing or selling protection through credit default swaps, adjusting the fund's duration through the tactical use of interest related derivatives, generating additional income through inflation or volatility linked derivatives or increasing its currency exposure through the use of currency related derivatives. Derivatives could also be employed to create synthetic instruments. Such derivatives include over-the-counter and/or exchange traded options, futures, warrants, swaps, forward contracts and/or a combination of the above.

The fund maintains a higher overall sustainability score than Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index, based on the investment manager's rating system. More details on the investment process used to achieve this can be found in the Fund Characteristics section of the Fund Details, as set out in Appendix III of the Prospectus.

The fund will have no or limited Renminbi (RMB) denominated underlying investments.

#### Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index, the Bloomberg Global Aggregate Corporate USD index, the Bloomberg Global High Yield USD index, and the JP Morgan EMBI Global Total Return index. The comparator benchmarks are only included for performance comparison purposes and do not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap materially with the components of the comparator benchmarks. The Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index is also used for sustainability score comparison. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

### **Use of derivatives / investment in derivatives**

The fund's net derivative exposure may be up to 50% of the fund's net asset value.

### **What are the key risks?**

**Investment involves risk. Please refer to the offering document for details including the risk factors.**

#### **1. General investment risk**

The fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the fund may suffer losses. There is no guarantee of the repayment of principal.

#### **2. Risk relating to investment in debt securities**

- **Credit and counterparty risk**— Investment in debt securities is subject to the credit/default risk of the issuer which may also adversely affect the settlement of the securities.
- **Interest rate risks**— Investment in the fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.
- **Below investment grade and unrated debt securities**— Investments in fixed income securities below investment grade or unrated are generally subject to higher degree of counterparty risk, credit risk, volatility risk, liquidity risk and risk of loss of principal and interest than higher rated securities.
- **Credit ratings risk**— Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Credit downgrading risk**— The credit rating of debt securities or their issuers may subsequently be downgraded. In the event of such downgrading, the value of the fund may be adversely affected. The investment manager may not be able to dispose of such securities immediately and the fund may therefore be subject to additional risk of loss.
- **Liquidity and volatility risk**— Securities not listed or rated or actively traded may have low liquidity and higher volatility. The prices of such securities may be subject to fluctuations. The bid and offer

spread of their price may be high and the fund may therefore incur significant trading costs and may even suffer losses when selling such instruments.

- **Valuation risk** – Valuation of the fund's investment may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the fund.

### 3. Sovereign debt risk

Investment in sovereign debt obligations issued or guaranteed by governments or their agencies of certain developing countries and certain developed countries may expose the fund to political, social and economic risks. A government entity's willingness or ability to repay principal and interest due in a timely manner may be affected by various factors. In the event that a government entity defaults on its sovereign debt, holders of sovereign debt, including the fund, may be requested to participate in the rescheduling of such debt and to extend further loans to the relevant government entity. The fund may suffer significant losses in such events.

### 4. Emerging and less developed markets

The fund may invest in emerging and less developed markets. Investing in emerging and less developed markets is subject to greater risks than investing in securities of developed countries such as ownership and custody risks, political and economic risks, market and settlement risks, liquidity and volatility risk, legal and regulatory risks, taxation risk, execution and counterparty risk, and currency risk, which may adversely affect the net asset value per share of the fund and investors may as a result suffer losses.

### 5. Derivatives

The fund may use derivatives to meet its specific investment objective. There is no guarantee that the performance of derivatives will result in a positive effect for the fund. Derivative exposure may lead to a high risk of significant capital loss. Risks associated with derivatives include credit risk and counterparty risk, liquidity risk, valuation risk, volatility risk, over-the-counter transaction risks and hedging risk. The leverage element/component of derivatives can result in a loss significantly greater than the amount invested in the derivatives by the fund. There is no guarantee that the desired hedging instruments will be available or hedging techniques will achieve their desired result. In adverse situations, the use of hedging instruments may become ineffective in hedging and the fund may suffer significant losses.

### 6. Risks relating to distributions

- For distribution share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital; capital growth will be reduced and in periods of low growth capital erosion may occur.
- Distribution share classes with a fixed dividend policy will distribute the dividends based on a fixed amount or fixed percentage of the net asset value per share. This may result in share classes with fixed distributions either paying out both income and capital in distribution payments, or not substantially distributing all the investment income which a share class has earned.
- Investments in distribution share classes with fixed dividend policy are not an alternative to a savings account or fixed-interest paying investment. The percentage or amount of distributions paid by distribution share classes with fixed dividend policy is unrelated to expected or past income or returns of these share classes or the fund. The distribution can thus be higher or lower than the income and return that were effectively realised.
- Distribution share classes with fixed dividend policy will continue to distribute in periods that the fund has negative returns or is making losses, which further reduces the net asset value of the distribution share classes with fixed dividend policy. In extreme circumstances, investors may not be able to get back the original investment amount.

- Investors should note that a positive distribution yield does not imply a positive return. Distribution share classes with a fixed dividend policy do not distribute a fixed amount (except for the share classes with a stated fixed dividend amount, as appropriate) and the constant percentage of distribution results in higher absolute distributions when the net asset value of the relevant distribution share classes with fixed dividend policy is high, and lower absolute distributions when the net asset value of the relevant distribution share classes with fixed dividend policy is low.
- **You should note that in the circumstances where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share.**
- The distribution amount and net asset value of the currency hedged share class may be adversely affected by differences in the interest rates of the reference currency of the currency hedged share classes and the fund's base currency, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-currency hedged share classes.

## 7. Risks relating to hedging and the hedged classes

- In respect of the share classes which the management company of the fund has the ability to fully hedge the shares of such share classes in relation to the fund currency, currency exposures or currency hedging transactions within the fund's portfolio will not be considered. The aim of a currency hedged share class is to provide you with the performance returns of the fund's investments by reducing the effects of exchange rate fluctuations between the fund currency and the reference currency. However there is no assurance that the hedging strategies employed will be effective in fully eliminating the currency exposure to the reference currency thereby delivering performance differentials that are reflective only of interest rate differences adjusted for fees.
- Where undertaken, the effects of this hedging will be reflected in the net asset value and, therefore, in the performance of such share class. Similarly, any expenses arising from such hedging transactions will be borne by the share class in relation to which the expenses have been incurred.
- It should be noted that, where relevant, these hedging transactions may be entered into whether the reference currency is declining or increasing in value relative to the relevant fund currency and so, where such hedging is undertaken it may substantially protect investors in the relevant share class against a decrease in the value of the fund currency relative to the reference currency, but it may also preclude investors from benefiting from an increase in the value of the fund currency.

## 8. Currency risks

Assets and share classes may be denominated in currencies other than USD and some may not be freely convertible. The fund may be adversely affected by changes in foreign exchange rates and exchange rate controls of the currencies in which securities are held, the reference currencies of the share classes and the US Dollar. This exposes all share classes of the fund to exchange rate fluctuations and currency risk. It may not be practicable or possible to hedge against such foreign exchange/currency risk exposure.

## 9. RMB Currency Risk and RMB share classes related risk

- RMB is currently not freely convertible and is subject to foreign exchange control policies and restrictions.
- There can be no assurance that RMB will not be subject to depreciation. Any depreciation of RMB could adversely affect the value of investor's investment in share classes denominated in RMB.
- Share classes denominated in RMB will be valued with reference to offshore RMB ("CNH") rather than onshore RMB ("CNY"). While CNH and CNY represent the same currency, they are traded at different rates. Any divergence between CNH and CNY may adversely impact investors.
- Non-RMB based investors in share classes denominated in RMB may have to convert HK dollar or other currency(ies) into RMB when investing in share classes denominated in RMB and subsequently convert

the RMB redemption proceeds and/or dividend payment (if any) back to HK dollar or such other currency(ies). Investors will incur currency conversion costs and you may suffer losses depending on the exchange rate movements of RMB relative to HK dollar or such other currencies.

- Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.

## How has the fund performed?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the fund's Class A USD Accumulation increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Comparator benchmarks: Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index\*, Bloomberg Global Aggregate Corporate USD index\*\*, Bloomberg Global High Yield USD index\*\*\* and JP Morgan EMBI Global Total Return index
- Fund launch date: 2016
- Class A USD Accumulation launch date: 2017
- The management company views the Class A USD Accumulation, being the retail share class denominated in the base currency of the fund, as the most appropriate representative share class of the fund.

Note: The performance of these years was achieved under circumstances that no longer apply. During 2018 to 2019, there were material changes to the fund, namely, changes of investment objective and policy, change of investment delegates and reduction of fee(s).

## 本基金是什麼產品？

基金為施羅德環球基金系列旗下的一項子基金，施羅德環球基金系列以互惠基金形式在盧森堡成立，監管機構為盧森堡金融業管理局(Commission de Surveillance du Secteur Financier)。

## 目標及投資策略

### 投資目標

基金旨在通過投資於由全球各地政府及公司發行的定息和浮息證券，以提供收益和資本增值。基金旨在減低跌市時的損失。減低損失不能獲得保證。

### 投資政策

基金被積極管理及將最少三分之二的資產投資於由全球各地（包括新興市場國家）政府、政府機構、跨國組織和公司發行的定息和浮息投資級別及高收益證券。

基金可以：

- 將超過 50%的資產投資於信貸評級低於投資級別的證券（就具評級債券而言，按標準普爾的評級，或其他信貸評級機構的任何同等級別；就未獲評級債券而言，按施羅德的評級）；
- 將最多 20%的資產投資於資產抵押證券和按揭抵押證券；
- 將最多 10%的資產投資於可換股債券（包括或有可轉換債券）；和
- 將最多 10%的資產投資於開放式投資基金。

投資經理將根據定量和定性基礎因素評估定息工具的信貸風險，包括但不限於發行人的槓桿、經營溢利、資本回報、利息覆蓋率、營運現金流、行業前景、公司的競爭地位及企業管治問題。就此目的而言，如有關證券本身沒有信貸評級，可參考該證券發行人的信貸評級。如證券和有關發行人均沒有評級，則證券將被分類為未獲評級的證券。

基金可將其最多 40%的資產淨值投資於新興市場債務（定息和浮息）證券。

投資經理旨在透過對基金的資產配置實現多樣化，遠離被識別為具高度的重大負回報風險的市場範疇，以減低損失。基金亦可將不多於三分之一資產直接或間接投資於其他證券（包括其他資產類別）、國家、地區、行業或貨幣、認股證及貨幣市場投資項目，和持有現金（受發行章程附件 I 所載的限制所規限）。

投資經理現時無意將基金超過 10% 的資產淨值投資於任何單一國家發行或保證，但信貸評級低於投資級別的證券。基金可將少於 30% 資產淨值投資於金融機構發行且具虧損吸收特性的債務工具（例如：金融機構的控股公司發行的或有可轉換債券、額外一級、一級及二級資本票據、高級非優先票據、高級及後償債券）。一旦發生觸發事件，此等工具可能須進行或然減記，或或然轉換為普通股。

基金可將其最多 10% 資產淨值投資於在香港以外地區發行的保險相連證券（「ILS」）（例如災難債券）及 / 或任何 ILS 相關產品（例如其收益與任何 ILS 表現掛鈎的衍生工具或結構性產品及其投資目標或主要投資策略是投資於 ILS 的集體投資計劃）。為免生疑問，基金不會投資於在香港發行的 ILS 及其重新包裝的產品及衍生工具。

在特殊情況下（例如：股災或重大危機），基金可暫時將其最多 100% 的資產淨值投資於諸如銀行存款、存款證、商業票據及國庫券等流動資產作現金流管理。

基金為達致投資增益、減低風險或更有效地管理基金，可運用長倉和短倉的衍生工具。

基金可例如在以下情況運用衍生工具以產生額外收益：透過買賣信貸違約掉期合約的保障投資於信貸風險、透過策略性地使用利息相關衍生工具調整基金年期、使用通脹或波動性相關衍生工具產生額外收益，或使用貨幣相關衍生工具以增加貨幣投資。亦可運用衍生工具以提供合成工具。該等衍生工具包括場外交易及 / 或交易所買賣的期權、期貨、認股證、掉期、遠期合約，及 / 或以上組合。

根據投資經理的評分標準，基金比 Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index 維持較高的整體可持續評分。有關達致此目的所使用的投資過程，詳情請見發行章程附件 III 基金特色一節。

基金將不會投資或有限度地投資於以人民幣定值的投資項目。

### 基準

基金沒有目標基準。基金的表現應與 Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index、Bloomberg Global Aggregate Corporate USD index、Bloomberg Global High Yield USD index 及 JP Morgan EMBI Global Total Return index 作比較。比較基準只作比較表現用途，並不決定投資經理如何投資基金資產。基金的投資領域預期與比較基準的成份有顯著範圍的重疊。Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index 亦可用作比較可持續評分。基準不會考慮基金的環境及社會特色或可持續目標（如相關）。

## 衍生工具的運用 / 投資於衍生工具

基金的衍生工具風險承擔淨額可達至基金資產淨值的 50%。

## 本基金有哪些主要風險？

投資涉及風險。請參閱銷售文件，了解風險因素等資料。

### 1. 一般投資風險

基金的投資組合價值可因下述任何主要風險因素而下跌，可能導致閣下的投資蒙受損失。概不保證可取回本金。

### 2. 有關投資於債務證券的風險

– **信貸和對手方風險** - 投資於債務證券承受發行商的信貸 / 違約風險，可能對證券的結算造成不利影響。

- **利率風險** - 投資於基金承受利率風險。一般來說，利率下跌時債務證券的價格會上升，而利率上升則價格會下跌。
- **低於投資級別和未獲評級的債務證券** - 投資於低於投資級別或未獲評級的定息證券，與擁有較高評級證券相比，一般承受較高程度的對手方風險、信貸風險、波動性風險、流動性風險和本金及利息虧損的風險。
- **信貸評級風險** - 由信貸評級機構給予的信貸評級受若干限制，不可在所有時間保證證券和 / 或發行商的信譽。
- **信貸評級被降低的風險** - 債務證券或其發行商的信貸級別可能在後來被降級。當被降級，基金的價值可能受負面影響。投資經理未必即時出售該等證券，基金或會因而承受額外損失的風險。
- **流動性和波動性風險** - 未上市、未獲評級或未有活躍交易的證券的流動性偏低和波動性偏高。該等證券的價格或會承受波動。該等證券的買賣差價或會偏高，基金在出售該等工具時可能會產生重大的交易成本，甚至可能蒙受損失。
- **估值風險** - 對基金的投資進行的估值或涉及含糊和主觀的決定。假如該等估值原來是不正確的，可能影響基金的資產淨值計算。

### 3. 主權債務風險

基金投資於若干發展中國家和已發展國家的政府或其代理發行或保證的主權債務可能承受政治、社會及經濟風險。政府機構如期償還到期本金和利息的能力或意願受多種因素影響。當政府機構對其主權債務違約，主權債務持有人（包括基金）或會被要求參與該等債務重組，額外借款給相關政府機構。基金可能在該等事件中蒙受重大損失。

### 4. 新興和較落後市場

基金可投資於新興和較落後市場。投資於新興和較落後市場涉及的風險較投資於已發展國家的證券為高，例如擁有權及保管權風險、政治和經濟風險、市場及結算風險、流動性及波動性風險、法律及監管風險、執行及對手方風險及貨幣風險。基金的每股資產淨值亦可能負面地受影響，投資者繼而蒙受損失。

### 5. 衍生工具

基金可投資於衍生工具以達致特定投資目標。不保證該等衍生工具的表現會為該基金帶來正面影響。投資於衍生工具或須承受高度的資本虧損風險。涉及衍生工具的風險包括信貸風險和對手方風險、流動性風險、估值風險、波動性風險、場外交易市場交易風險，以及對沖風險。衍生工具的槓桿元素／成份可導致虧損顯著多於基金投資於衍生工具的金額。基金不保證市場能提供理想的對沖工具，或對沖技術可以達到預期效果。在不利的情况下，基金使用的對沖工具可能無效，並可能因而蒙受重大虧損。

### 6. 有關派息的風險

- 就採取一般派息政策的收息股份類別而言，支出將從資本（非總收入）中支付，可分派收入金額因此而增加，而增加的金額可被視為從資本中支付的股息。資本增長將減慢，在低資本增長時期或會出現資本侵蝕。
- 採取固定派息政策的收息股份類別將基於一個固定金額或每股資產淨值的一個固定百分比派息。因此，派發固定股息之股份類別，其股息款項可能同時由收入及資本中支付，或未必將股份類別賺到的大部份投資收入完全派發。
- 投資於採取固定派息政策的收息股份類別不是儲蓄帳戶或定息派付投資的替代選擇。採取固定派息政策的收息股份類別所支付的派息百分比或金額與此等股份類別或有關基金的預期或過往收入或回報並不相關。因此，派息可高於或低於已實際變現的收入及回報。
- 採取固定派息政策的收息股份類別將繼續在有關基金錄得負回報或虧損的期間派息，此舉將進一步減少有關採取固定派息政策的收息股份類別的資產淨值。在極端情況下，投資者未必能取回原本的投資額。

- 投資者應注意，正派息收益率並不意味正回報。採取固定派息政策的收息股份類別並不分派固定金額（但設有固定派息金額的股份類別除外，如適當），而不變的百分比會導致當有關採取固定派息政策的收息股份類別的資產淨值偏高時，絕對派息將會較高，以及當有關採取固定派息政策的收息股份類別的資產淨值偏低時，絕對派息將會較低。
- **閣下應注意從資本中支付的派息，即相當於從閣下原本投資的金額中，或從該等金額賺取的任何資本收益中退回或提取部份款項，所以，該等派息可能導致每股資產淨值即時下跌。**
- 貨幣對沖股份類別的參考貨幣與基金的基本貨幣的利率差別可能對貨幣對沖股份類別的派息金額及資產淨值造成不利影響，導致從資本中支付的派息金額增加，使資本被侵蝕的程度較其他非貨幣對沖股份類別為高。

## 7. 有關對沖及對沖類別的風險

- 對於股份類別而言，在基金之管理公司可將該等股份類別的股份全部對沖基金貨幣的情況下，將不會考慮基金組合內進行的貨幣投資或貨幣對沖交易。貨幣對沖股份類別之目的是減少基金貨幣和參考貨幣之間匯率浮動之影響，就基金之投資提供業績回報。然而，基金運用之對沖策略不保證一定有效完全消除參考貨幣的貨幣風險，從而提供僅因不同利息（經收費調整後）反映出來的不同表現。
- 當進行該類對沖時，此種對沖的影響將反映於資產淨值，從而反映於該種股份類別的表現。同樣，由於該等對沖交易而引致的任何開支將由開支所涉及股份類別承擔。
- 懇請注意，倘適用，參考貨幣相對於有關基金貨幣的價值不論下跌或上升，均可訂立該等對沖交易，因此當進行有關對沖，即可大幅保障有關股份類別投資者避免基金貨幣相對參考貨幣的價值下跌，惟亦會限制投資者享有基金貨幣升值之利。

## 8. 貨幣風險

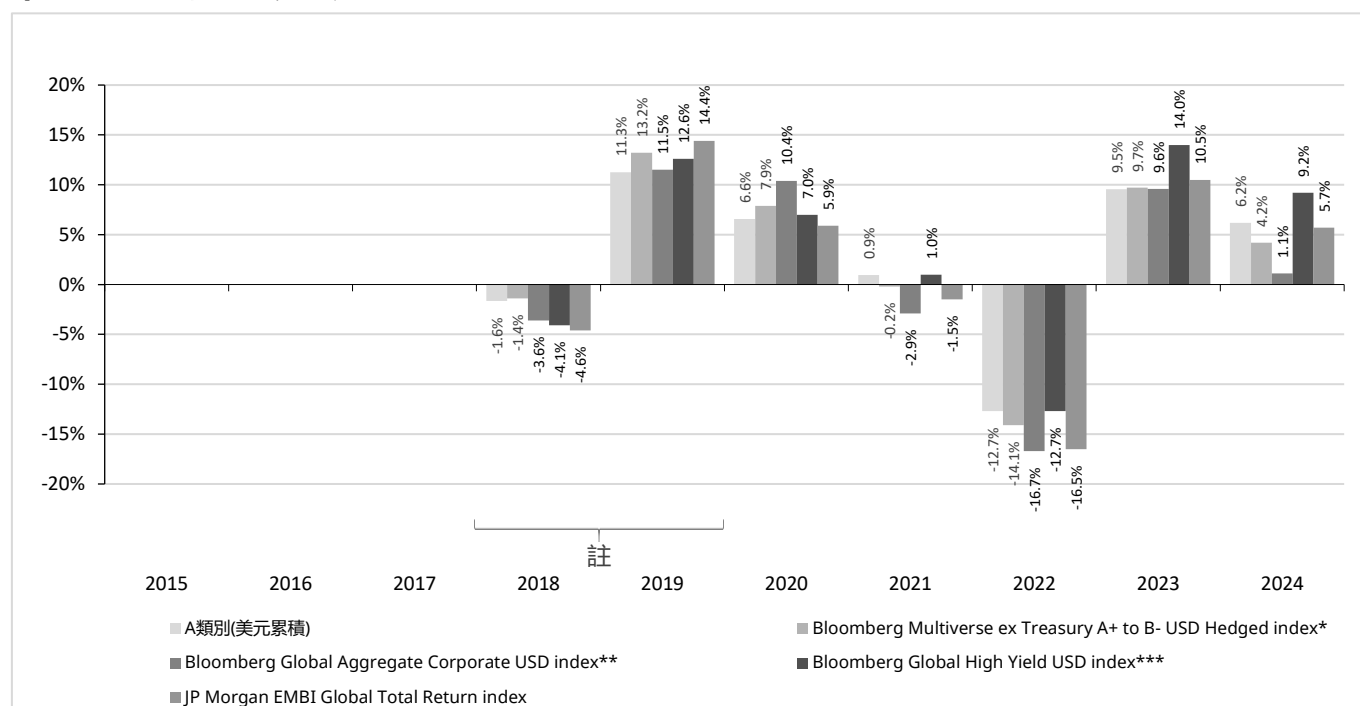

資產和股份類別可以美元以外的貨幣為計算單位，部分或會不能自由兌換。基金可能因持有證券的貨幣、股份類別參考貨幣和美元之間的匯率變動及匯率控制而遭受不利影響，使基金所有股份類別承受匯率浮動和貨幣風險。對於對沖該等外匯 / 貨幣風險，基金或會難以或未能作出。

## 9. 人民幣的貨幣風險及人民幣股份類別相關風險

- 人民幣現時不可自由兌換，須遵守外匯管制政策及限制。
- 無法保證人民幣不會貶值。人民幣的任何貶值可負面地影響投資者於以人民幣定值股份類別的投資價值。
- 人民幣股份類別參考境外人民幣（「CNH」）而非境內人民幣（「CNY」）的價值計值。CNH 及 CNY 雖屬相同貨幣，但以不同的匯率交易。CNH 與 CNY 的任何分別可能負面地影響投資者。
- 並非以人民幣為基本貨幣的投資者，在投資人民幣股份類別時可能須將港幣或其他貨幣兌換為人民幣，其後亦須將贖回人民幣所得款項及 / 或人民幣派息（如有）兌換為港幣或該等其他貨幣。因此視乎人民幣兌港幣或其他貨幣的匯率走勢而定，投資者將須承擔貨幣匯兌成本並可能帶來損失。
- 在特殊情況下，以人民幣支付贖回款項及 / 或派息可能因人民幣的外匯管制和限制而延遲。

## 本基金過往的業績表現如何？

- 往績並非預測日後業績表現的指標。投資者未必能取回全部投資本金。
- 基金業績表現以曆年末的資產淨值作為比較基礎，股息會滾存再作投資。
- 上述數據顯示基金的 A 類別 (美元 累積)總值在有關曆年內的升跌幅度。業績表現以美元計算，當中反映出基金的持續費用，但不包括基金可能向閣下收取的認購費及贖回費。
- 如年內沒有顯示有關的業績表現，即代表當年沒有足夠數據用作提供業績表現之用。
- 比較基準: Bloomberg Multiverse ex Treasury A+ to B- USD Hedged index\*, Bloomberg Global Aggregate Corporate USD index\*\*, Bloomberg Global High Yield USD index\*\*\* 和 JP Morgan EMBI Global Total Return index
- 基金發行日: 2016
- A 類別 (美元 累積)發行日: 2017
- 管理公司視 A 類別 (美元 累積) (即以基金的基本貨幣計值的零售股份類別) 為基金的最適合代表股份類別。

註：這些年度的業績表現乃在不再適用的情況下取得的。於 2018 年至 2019 年，基金出現重大變更，即投資目標及政策變更、獲轉授投資職能者變更和費用下調。
